#### **LETTER OF SUPPORT – SUMMER SCHOOL OF SCIENCE**

This letter is to express the support of the Swiss Federal Institute of Technology – ETH Zurich for the “Summer School of Science” 2014 project.

The Summer School of Science is an international interdisciplinary workshop for talented high school students interested in science and technology. Besides teaching the scientific method, the goal of the School is to provide young people with role models and promote international and intercultural understanding.

The School is organized by the Croatian non-profit organization “Society for Out of Frame Education” (EVO), founded by young scientists and supported, among others, by Open Society Foundations, Google RISE Award, the Croatian government and through European Union FP7 grants.

The Summer School of Science has a long lasting relationship with ETH Zurich – a large number of organizers, project leaders and lecturers have participated in the Summer School over the years. The School currently has an alumni population of over 250 students from more than 20 countries and has trained a number of volunteer mentors and collaborators from top scientific institutions around the world

Due to the educational importance of this School, ETH Zurich gives its full academic support to the project of the Summer School of Science 2014 in Pozega.

Yours sincerely

Lino Guzzella
